Project partners range from local organizations to state & federal agencies!

### FUNDING SOURCES

8.4% of project costs supplied by ANA Funds

WHO CONTRIBUTED WHAT?

91.6% of project costs supplied by project partners!

ANAC IS SMALL BUT FILLS THE CONSERVATION GAPS BY

- Being point of first contact for Monktonites
- Funding the initial steps to start a project
- Finding appropriate project partners
- Uniquely able to fill project funding gaps

NOTABLE PARTNERS

- Vermont Land Trust
- Nature Conservancy
- State & Federal Government
- Private Donations

### RECENT SUCCESS STORIES

Last Resort\*

Huizenga Farm

Full Belly Farm

\*Option to Purchase at Agricultural Value - this easement (the first in Monkton!) predated the option for the next owner to purchase the conserved ag land at agricultural value (minus the development potential), so this easement was updated to help transfer The Last Resort Farm to the next generation. All other ag easements in Monkton have the OPAV included in current easement language.

Triple-dipping allowed!

These projects were a win-win-win situation: a relatively small amount of money from Monkton was leveraged into millions of dollars of funding (win one), local lands were conserved that otherwise might have been developed (win two), conservation money was spent on improvements that paid local businesses and people to upgrade existing facilities and make improvements. (win three)!

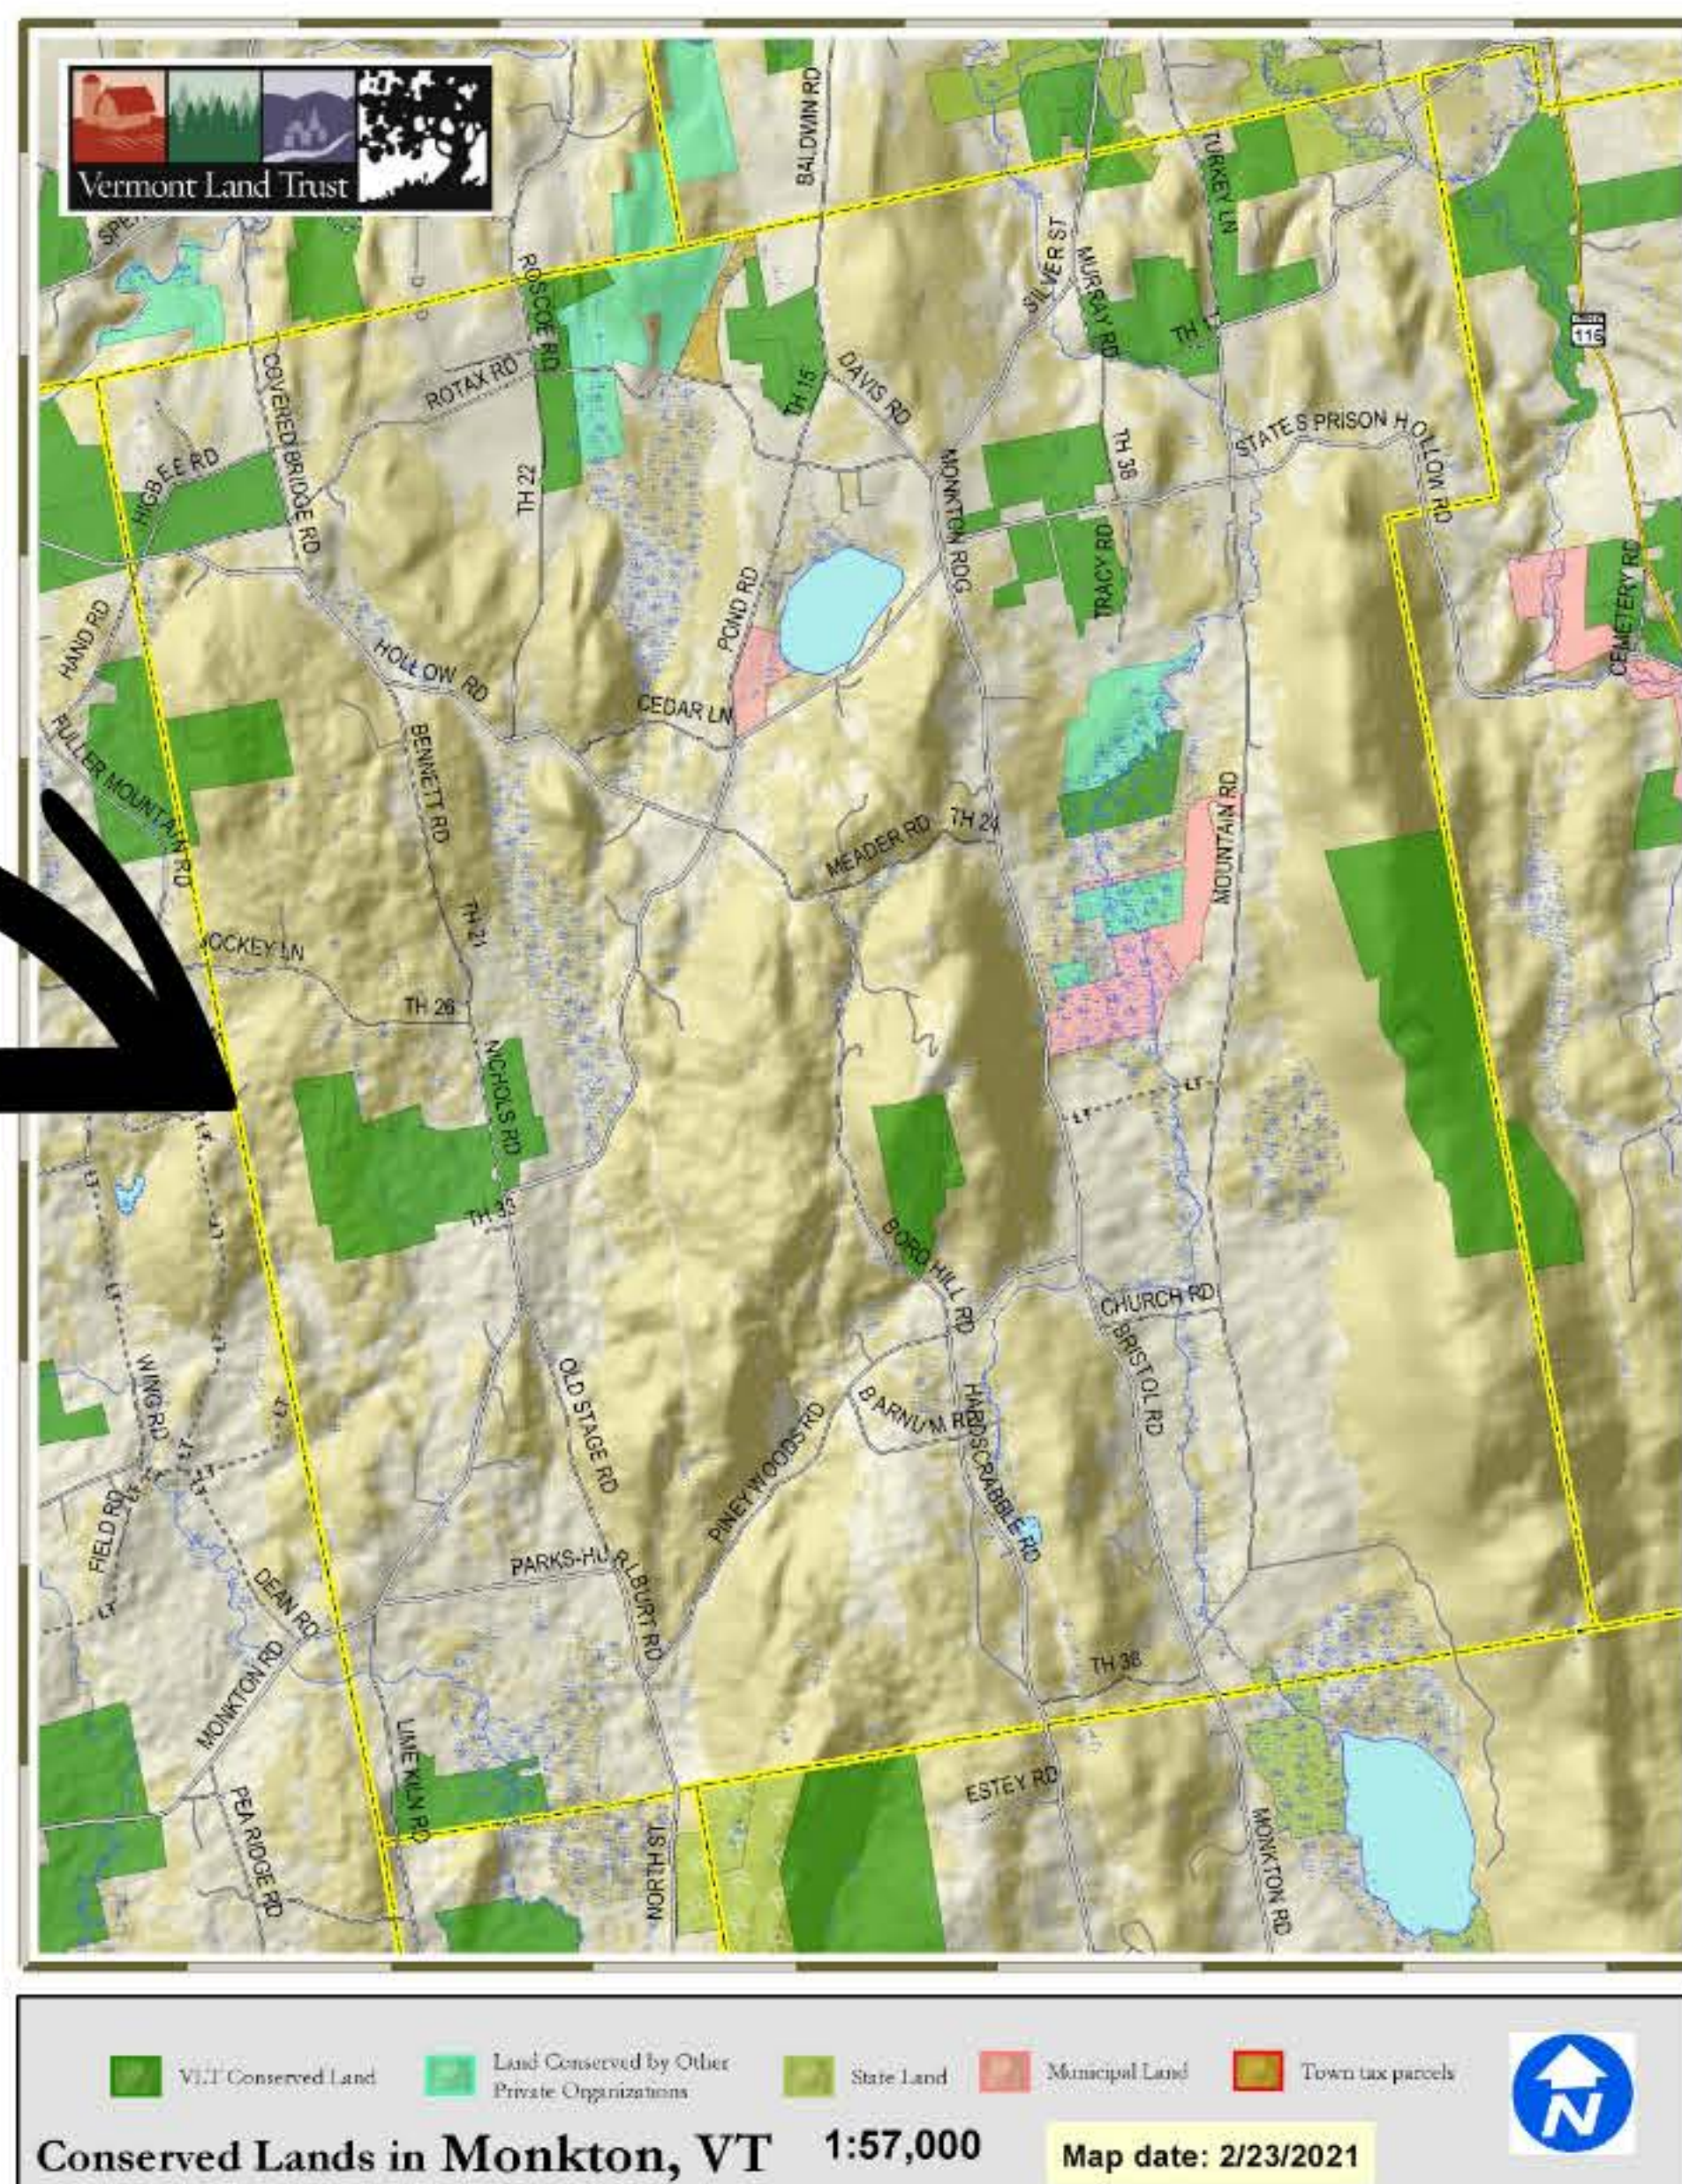

### OPPORTUNITY

What's Next?

This map of Monkton shows conserved parcels.

There are still plenty of opportunities to continue ANAC's good work of helping with the inter-generational transfer of farmlands, protection of wetlands, and keeping working forestlands in Monkton. Please let us know if you have questions or want more information. Your support is much appreciated!
