

Monkton Energy Committee

Meeting Minutes

March 16, 2022

Attending: Mark Boltz-Robinson, Chris Boekman

Absent: Alex Perkins

Guest: None

Call to order

Reviewed some action items. M. Boltz-Robinson updated the committee on the previous month's meeting with Maddi from ACRPC. Committee discussed continuing absence and lack of communication from A. Perkins.

C. Boekman asked about community events. Noted it might engender more community involvement to have an event of some kind. M. Boltz-Robinson suggested a fresh energy survey might help, following the 2015 survey. Maybe use Survey Monkey, or do a new in person event? Consider a Button Up event in the fall for efficiency promotion?

Town Hall Rooftop Solar

Committee agreed to revisit the quotations for installation to have more info to provide Selectboard. C. Boekman would check with Green Mountain Solar and Bristol Electric. M. Boltz-Robinson would follow up with SunCommon (now iSun) and SunRun.

Town Hall EV Charger

Grants and funding? Still haven't found anything useful. Check with Maddi on any updates from ACRPC?

Battery Storage

Start researching. Looking into Tesla PowerWall, Generac, enPhase.

Energy Efficiency

Talk to the Button Up coordinator about helping out with events this fall.

Adjournment 20:00.
