# SPACE NEEDS WORKSHEET

## INSTRUCTIONS: Fill in or check off all shaded worksheet cells.

## DESIGN POPULATION

Projected resident population		2,000
Nonresident service population		0
Design population	······	2,000

## COLLECTION SPACE

Books: The space needed for the library's book collection is determined by the	ne size of the collection and the
parameters of the shelving environment. Depending on factors such as height of the shelving, book collections can be housed at 10, 13 or 15 v volumes housed per square foot increases, the average aisle width will d	olumes per square foot. As the
shelving will grow, and there will be fewer opportunities for marketing disp	blay.
* How many volumes will be in the library' s print collection?	
* What is the library's preferred collection density? (choose one)	
	X 13 volumes per sq.
	15 volumes per sq.
Magazine / newspapers: The Americans with Disabilities Act specifies that cu	urrent issue display shelving for
magazines is subject to height limitations, which conditions how much sp	
* How many titles will the library receive?	0
<b>Magazine backfile:</b> Shelving for any back issues retained by the library is NOT	subject to reach limitations آ
but many libraries choose to treat these holdings in the same manner.	
* How many of those titles will the library retain in backfiles? * What will be the average backrun for a typical title (in years)?	0 0
Nonprint: This collection will often be housed on lower shelving with more m	arketing display, but because
these items are typically smaller than books, the collection density corre The space need varies depending on aisle widths, marketing display, and s	-
* How many nonnprint items will the library house?	150
* What is the library's preferred collection density? (choose one)	X 10 items per sq.ft.
	13 items per sq.ft.
	15 items per sq.ft.
Public access computers: Many libraries today experience increasing demands	s for access to digital
information resources, which affects the number of stations needed for	
can also affect the inventory needed. The space need per station will be	e affected by the number of
stations provided: a small inventory will usually require more space per s	-
inventory will benefit from economies of scale and less space per station	
· · · · · · · · · · · · · · · · · · ·	
* What is the preferred space allocation for each? (choose one)	
	X 45 sq.ft. per statior
	50 sq.ft. per statior

The number of reader seats a library needs is determined in large measure by the number of people the library serves, although other factors may also affect this inventory. Typically allow 30 square feet per seat. \* How many reader seats should the library provide? 

#### **STAFF WORK SPACE**

The inventory of staff work stations is based on the specific operations and work routines of the library, the number of public service desks, and so on. The space needed for each station, on average, will be affected by the number of work stations a library needs: a small inventory will require more space per station while a larger inventory will need less space per station.

- \* How many staff work stations are needed?
- \* What is the preferred space allocation for each? (choose one)

	1
choose one)	125 sq.ft. per statio
	140 sq.ft. per static
	X 150 sq.ft. per statio

5

1

#### MEETING ROOM SPACE

Multi-purpose:	How many seats to accommodate in a multi-purpose room?		0
Conference:	How many seats to accommodate at a conference table?		0
	How many seats in a gallery?		0
Storytime:	What is the maximum audience for a typical storytime?		15
	Do your storytimes include a craft of activity? (choose one)	XYes	No
Computer training	g lab: How many trainees should be accommodated?		0

## SPECIAL USE SPACE

Special use space reserves space for features such as small group study rooms, a copy center, a public café or refreshment area, a used book sale area, a staff break room, and so on. A larger proportionate allocation here reserves the option to incorporate a wider array of special use functions as a specific architectural plan is developed.

\* Choose the library's preferred allocation for special use space

 Х	12% of gross area
	15% of gross area
	17% of gross area

## NONASSIGNABLE SPACE

Nonassignable space reserves space for such necessary features as mechanical rooms, restrooms, stairwells and elevators. Typically a smaller building will need to reserve a larger share of its gross area for nonassignable purposes, while a larger building will require a smaller proportion for nonassignable. New construction will likely need a smaller proportion than an addition or renovation. \* Choose the library's preferred allocation for nonassignable . . . . . . . . . . .

#### ADDITIONAL ALLOWANCES

As an option, this worksheet can accommodate additional special allowances for features that may or may now be adequately accommodated in the preceding calculations. These may include space for an automated materials handling system, or a garage (if the library owns and operates vehicles). List any such special features here, along with a suitable square foot allowance

	Allowance
